Monitor traffic patterns	User inputted data	Cost of various parking spaces	Availability of parking lots	Repurpose Google Maps
User validation	Account security	Shows closest parking lot based on location	Event tracking	Live tracking
Responsive UI	Needs to be scalable/maintainable	Show if reservations/parking pass is required	Version control for updates	Inaccuracies in user input
Possible that patterns shown aren't consistent	Account hierarchy system	Abusive misinformation	Website/mobile application	Emails/newsletters as advertisement
